Ansley Public School Community,

Our District takes pride in supporting the needs of the whole child, and to endure that all the children are safe, supported and engaged and challenged each school day. Research indicated that initiatives focused on improving aspects of students' well-being in schools – such as addressing childhood obesity, preventing bullying, supporting students' mental health, and restricting use of exclusionary discipline – have been found to be successful in improving student success and academic excellence. We have assessed our wellness policy as part of the USDA requirements. Below are the results of our assessment:

The Alliance for a Healthier Generation 10-Step Checklist found that Ansley Public Schools' Local Wellness Policy is compliant with USDA requirements, with overall wellness and physical activity as strengths. The assessment identified opportunities to strengthen nutrition education and promotion goals. Moving forward, the district will enhance wellness committee involvement, increase wellness communication, and continue reviewing the policy to ensure ongoing compliance and improvement

Ansley Public Schools made strong progress toward achieving its Local Wellness Policy goals. Overall, the district remains committed to promoting student health and wellness through nutrition, physical activity, and school-based wellness initiatives while maintaining compliance with policy requirements.

The results of the Local Wellness Policy Triennial Assessment and related wellness information have been shared with the public through the district's website and board reports. Community members are encouraged to review the information on the district website or contact the Superintendent for additional information regarding the Local Wellness Policy, assessment results, and ongoing wellness initiatives.
